Dear colleague,

I am writing this reference letter at the request of Nosrat Moradi, who is seeking for an academic postdoctoral position.

As his scientific adviser and mentor, I have known Nosrat Moradi for more than 10 years. During his PhD period, Nosrat has been my teaching assistant in GIS courses for many years. Furthermore, He has participated as my co-worker in several land use planning projects; he is quite capable of teaching and working with GIS software and its related researches. I evaluate him as a promising expert and researcher in Geographic Information System (GIS), and specially its application in environmental studies.

Totally, he has proved himself as a hard-working, dependable, dedicated and well organized person. So, I highly recommend him to you and hope you judge his application favorably.

If you have any further questions with regard to his background or qualifications, please do not hesitate to contact me.

Sincerely,

Hedayat Nouri

Nouri

Professor of Geography at Faculty of Geographical Sciences and planning,
University of Isfahan, Iran
